

INTEGRATION DOCUMENT

Supports

PayUbiz

Magento 2.x

Introduction

This guide will show you how to Install and configure the PayUbiz plugin for Magento on your Magento powered website for payments through Credit Card, Debit Card, Net banking and Saved Cards. The plugin supports Payment through PayUbiz platforms.

Prerequisites

To Integrate PayUbiz payment gateway, you must:

1. Have a merchant account with PayUbiz
2. Know your **PayUbiz Salt & Key** to collect Payments via PayUmoney. These are available on the account details tab in PayUbiz dashboard.

Steps to Integrate

1. Extract the zip file and upload **PayUIndia** folder to Magento `<root>/app/code` .

Note: Please create a **code** folder under `<root>/app` if it doesn't already exist.

2. Disable the cache. To Disable the cache Go to Magento Admin Panel >

System > Cache

Management > Select all cache type from left side checkboxes > Select

Action : disable

from right top drop down > click **Submit**.

3. Run the magento commands:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

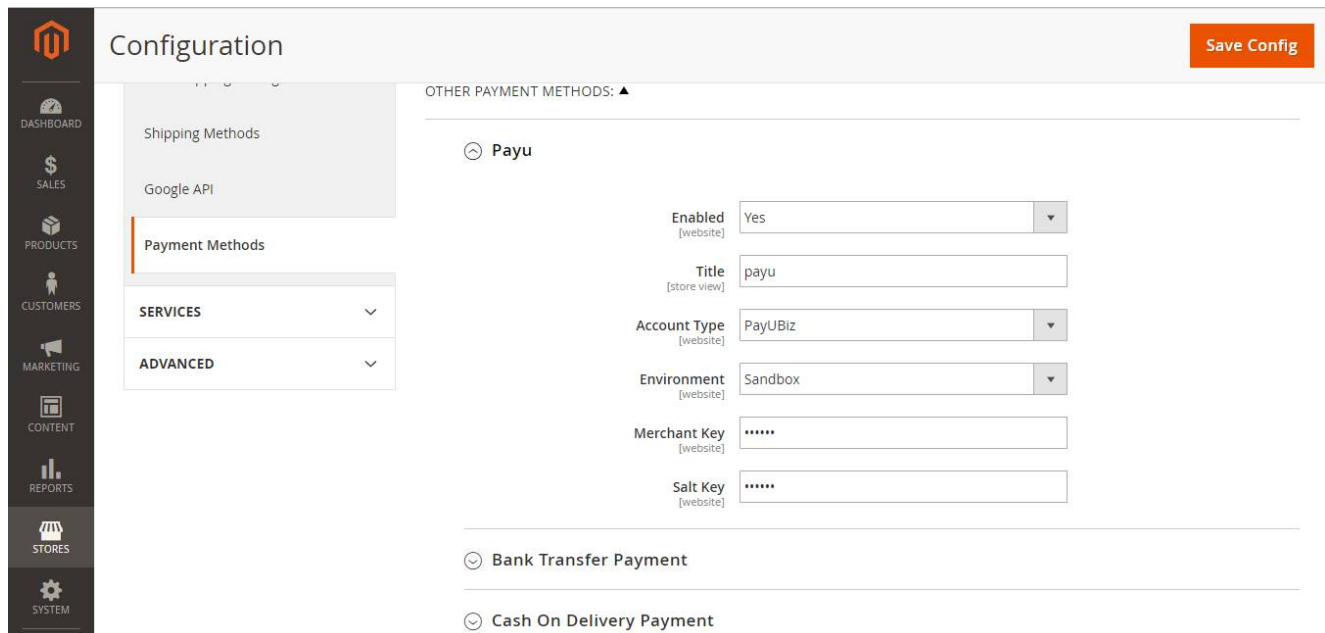

4. Configure the module in Magento Admin panel as shown in the configuration section.

Configuring the Plugin

1. Login to magento admin panel and Navigate to **Store -> Configuration-** >

Sales- > Payment

Methods . Expand the tab named '**PayU**'.

The screenshot shows the 'Configuration' page in the PayU Biz admin interface. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, and SYSTEM. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Under the 'Payment Methods' section, there are two expandable menus: 'SERVICES' and 'ADVANCED'. The 'SERVICES' menu is currently expanded, showing 'OTHER PAYMENT METHODS: ▲'. Under this, the 'Payu' method is selected and expanded. It contains the following fields: 'Enabled [website]' set to 'Yes', 'Title [store view]' set to 'payu', 'Account Type [website]' set to 'PayUBiz', 'Environment [website]' set to 'Sandbox', 'Merchant Key [website]' with masked characters, and 'Salt Key [website]' with masked characters. Below the 'Payu' method, there are two other payment methods listed: 'Bank Transfer Payment' and 'Cash On Delivery Payment', both with expandable arrows.

2. The page shown above should be displayed to you. If not, please clear the cache and then repeat this step.

3. Fill up the following configuration details.

a) Enabled: 'Yes' to enable the module.

b) Environment:

This field determines the gateway environment your payment will be redirected to.

This field can have three values :

1) sandbox – This is a test environment. No actual fund transfer will take place.

2) Production – This is the live environment. Use this value only for your website in

Production. Payments sent in production environment will actually get processed.

For testing purposes we suggest only use sandbox.

a) PayUbiz Key: If you have received PayUbiz credentials then enter this info.

b) PayUbiz Salt: If you have received PayUbiz credentials then enter this info.

3) Account Type: Select PayUbiz for account type.

4) Once you are done click on **Save Config** and your customers can make payment via the
PayUbiz will be displayed to the user.
